

# Fabrication **Maintenance** Operations

We deliver fabrication, maintenance, and operations services that strengthen assets and ensure reliability.

## About Us

OWO Integrated Services Limited is a fully indigenous, multi-disciplinary company specializing in fabrication, corrosion control, design, planning, construction, project management, and maintenance across the oil and gas, manufacturing, real estate, and infrastructure development sectors.

With over five years of combined project experience, our team has successfully supported government agencies and leading corporate organizations throughout Nigeria and West Africa.

We maintain a strong, multi-skilled workforce that includes architects, engineers, planners, urban designers, project managers, construction supervisors, welders, fitters, and technical personnel, enabling us to deliver comprehensive, end-to-end solutions across diverse project demands.

OWO Integrated Services Limited provides a broad range of construction management and general contracting services, including estimating, project control, project management, field supervision, and the capability to self-perform specialized work. Our teams collaborate closely with foreign technical partners and reputable architectural and engineering firms to ensure the delivery of high-value, technically sound construction projects.

Clients trust us for our quality assurance, technical expertise, and extensive in-house resources each solution tailored to the unique requirements of every client and project.

OWO Integrated Services Limited employs over 30 Nigerian professionals and engages specialist consultants both local and expatriate whenever required. We also encourage all staff to maintain membership with recognized local and international professional bodies to ensure continuous development and industry compliance.

## Our Vision

To render and maintain the best quality services in every project we undertake, and to become the leading fabrication and corrosion control company equipped with the most efficient tools, technology, and manpower in the industry.

## Mission

We remain committed to delivering quality services that improve lives and consistently achieve our goals. We execute every project with professionalism, integrity, and technical excellence, building trusted partnerships and strong client relationships. We prioritize community development, safety, environmental responsibility, and national growth, while upholding respect for people and time in all our engagements.

## Core Values

**+ Customer Focus:** We place our clients at the center of everything we do and consistently aim to exceed expectations.

**+ Honesty Operations:** We conduct all operations with transparency and truthfulness.

**+ Mutual Respect:** We value and uphold respect for our employees, clients, partners, and our organization.

**+ Strong Integrity:** Our team is guided by strong ethical and moral principles in every action.

**+ Safety First:** We prioritize safety by adhering to all company and client HSE and technical standards.

**+ Technical Leadership:** We engage qualified professionals and drive continuous improvement through regular training and capacity development.

# Company Policy

OWO Integrated Services Limited is committed to delivering quality performance, timely project execution, and cost-efficient services. Our management system is continually reviewed, with corrective actions implemented wherever required. We ensure full compliance with all contractual, regulatory, and technical requirements while maintaining a structured quality system supported by adequate resources. All personnel are expected to sustain required quality standards, ensure work is verifiable, and demonstrate compliance with contract specifications, codes, and procedures.

No project begins without proper approvals, and client engineering data is fully implemented to ensure performance, reliability, and safety across all operations.

## Quality Assurance

Quality assurance is central to our operations. We deliver products and services that meet client expectations and comply with all specifications, codes, and regulatory requirements. We maintain dedicated QA/QC personnel to monitor quality at every stage, ensure adherence to industry standards, and prevent service failures through continuous verification and inspections. Non-conformities are promptly investigated, with corrective actions taken to prevent recurrence. We maintain complete QA documentation and ensure every contract has clear quality procedures communicated throughout the organization. All engineering data, codes, and client specifications are kept current to support consistent and reliable project delivery.

## Services

- + Fabrication / Welding Maintenance
- + Corrosion Control Services (blasting & painting)
- + Facility Maintenance
- + Manpower Supply
- + Mechanical / Equipment Maintenance
- + Equipment Leasing

## Fabrication & Welding Maintenance

OWO Integrated Services Limited delivers precision-engineered fabrication solutions from our technologically advanced facility in Port Harcourt, Rivers State. Our workshop is equipped with certified machinery, automated tools, and specialized fabrication systems designed to meet strict industry, regulatory, and client-specific requirements.

Our technical workforce comprising coded welders, certified fitters, fabrication technicians, engineers, and QA/QC supervisors operates in full compliance with relevant international standards such as ASME, AWS, API, and ISO. We execute structural steel fabrication, piping works, pressure components, and custom assemblies with strict adherence to dimensional tolerances, weld procedures, NDT requirements, and material specifications.

Backed by world-class engineering support and reputable global technical partners, we ensure every project meets the highest benchmarks in quality, structural integrity, reliability, and operational performance.

# Corrosion Control Services

OWO Integrated Services Limited delivers advanced corrosion protection solutions engineered to maintain asset integrity across pipelines, structural steel, process equipment, and industrial facilities. Our capabilities cover abrasive blasting (sand, grit, and hydro-blasting), industrial coating application, specialized wrapping systems, cathodic protection support,

and pipeline corrosion monitoring/surveys. Our operations follow strict compliance with relevant international standards such as NACE/AMPP, ISO, SSPC, and API. Surface preparation, coating selection, and application procedures are executed using controlled methodologies to ensure proper adhesion, mil thickness accuracy, and

long-term performance in aggressive environments. With highly trained coating inspectors, certified blasters and painters, and modern corrosion-control equipment, we manage complex and high-risk projects with precision. We maintain rigorous HSE protocols, ensuring zero incidents, full adherence to project specifications, and reliable protection systems that optimize asset life-cycle performance.

# Facility Maintenance

OWO Integrated Services Limited delivers comprehensive facility maintenance solutions designed to preserve asset integrity, optimize performance, and minimize operational

downtime. Our approach is rooted in accurate condition assessment, proactive maintenance planning, and strict adherence to industry best practices.

We provide routine, preventive, and corrective maintenance services for a wide range of facilities,

including buildings, barges, warehouses, workshops, offshore platforms, and rigs.

Our expert team utilizes modern diagnostic tools, standardized maintenance procedures, and robust HSE protocols to ensure every task is executed safely, efficiently, and in full compliance with client specifications and

regulatory requirements. Through systematic inspections, timely interventions, and technical precision, we support continuous operations and extend the lifecycle of critical infrastructure.

# Manpower Supply

OWO Integrated Services Limited provides highly skilled and industry-certified personnel to support critical operations across fabrication, construction, maintenance, and oil and gas projects. Our workforce is built on a

foundation of technical competence, professionalism, teamwork, and continuous development ensuring every assignment is executed safely, efficiently, and in full compliance with client requirements.

We recruit, train, and deploy personnel who undergo rigorous screening, competency

verification, and HSE orientation to ensure they meet project-specific standards. Our

manpower solutions are available on both short-term and long-term contract bases, providing

clients with reliable technical support tailored to their operational needs.

## Available Skilled Personnel Include:

- + Structural and Pipe Welders
- + Mechanical Fitters
- + Crane and Compressor Operators
- + Scaffolders
- + Blasters and Industrial Painters
- + Argon/TIG Welders
- + General Labour and Technical Support Personnel

With a proven track record of delivering competent manpower to demanding project environments, OWO Integrated Services Limited remains committed to providing personnel who enhance productivity, maintain safety, and support seamless project operations.

# Mechanical & Equipment Maintenance

OWO Integrated Services Limited delivers comprehensive mechanical engineering solutions designed to support construction, maintenance, and operational reliability across industrial, oil and gas, and marine facilities. Our Mechanical Services Department executes a wide range of technically demanding activities with strict adherence to industry standards and client specifications.

Our capabilities include machine shop and foundry

operations, plant and equipment installation, refurbishment, and performance testing, as well as lubrication, repair, and preventive maintenance of mechanical systems. We also provide structural steel fabrication, assembly, and installation, alongside piping system installation, modification, and hydrostatic testing. In addition, our team delivers comprehensive corrosion control services, including abrasive blasting, advanced coating systems, and cathodic protection support.

OWO Integrated Services Limited deploys a highly skilled site crew equipped with modern tools and certified equipment to

execute the installation of structural components and mechanical systems with precision and safety. We install and

commission tanks, vessels, valves, pumps, skids, platforms, pipe supports, and other mechanical assemblies, ensuring

reliability, operational efficiency, and full compliance with applicable engineering codes and standards.

## Equipment Leasing

OWO Integrated Services Limited provides a comprehensive fleet of specialized equipment essential for efficient project execution across the oil and gas, construction, fabrication, and dredging industries in Nigeria. Our equipment is maintained to industry standards, ensuring reliability, safety, and optimal performance on every project.

In addition, we provide professional advisory services on equipment investment and utilization, as well as comprehensive equipment management on behalf of investors. Our support also covers operations and pre-mobilization services, backed by competent and certified

Available Equipment Includes: Air Compressors, Hydro Blasting Machines (Water Blasters), Welding Machines, Blast Pots, Airless Spray Machines, Cranes, Forklifts, Generators, Haulage Trucks. All equipment is supported by qualified operators and technicians where required. Our strong expertise in equipment management, sourcing, and procurement gives us a competitive advantage in supplying both new and used equipment, as well as genuine replacement parts, directly from Original Equipment Manufacturers (OEMs). This ensures clients receive dependable, high-quality assets that meet project specifications and operational demands.

equipment operators for cranes, graders, bulldozers, and other machinery. We further enhance project performance through operator training and competency evaluation, ensuring safe, efficient, and reliable equipment operations.

## Safety & Health Policy

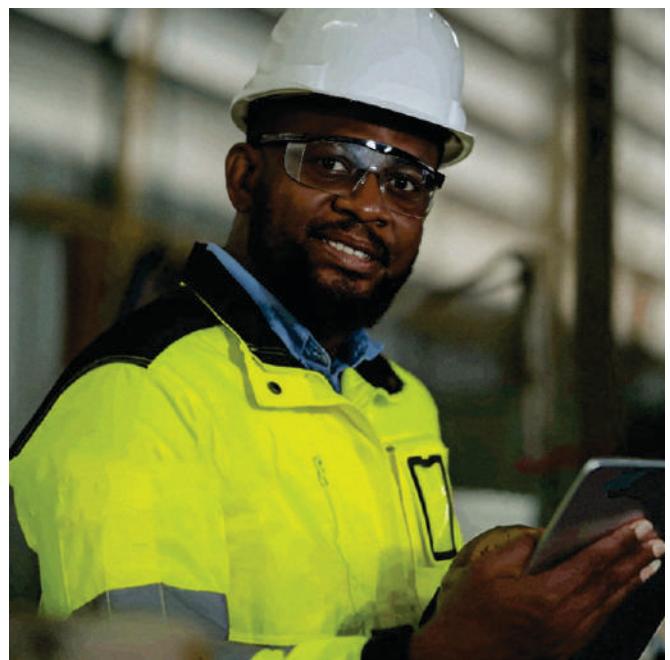

OWO Integrated Services Limited is firmly committed to achieving excellence in health, safety, and environmental performance through continuous improvement in our systems, awareness, and operational

culture. Our priority is to safeguard our employees, clients, contractors, and host communities by ensuring a safe, healthy, and incident-free work environment across all operations.

To achieve this, we:

- + Integrate health and safety into operational and management decision-making processes.
- + Cooperate with clients to understand their needs and implement best health and safety practices.
- + Ensure a safe work environment supporting all employees and contractors to achieve zero work-related injuries.
- + Ensure all staff are fully qualified and comply with workers' compensation and environmental regulations.

**Engr. Udeme O. Okon**  
Managing Director

# Certification

OWO Integrated Services Limited is fully registered with the Corporate Affairs Commission (CAC), confirming our legal authority to operate and deliver professional engineering and industrial services in Nigeria.

# Our Clients

**HALLIBURTON**

**Schlumberger**

**Geoplex**

**Universal  
Energy**

We are fully registered with the Federal Inland Revenue Service (FIRS) and holds a valid Taxpayer Identification Number (TIN), confirming our compliance with national tax regulations.
